

**A graduate student (Ms. Nutcharun Yanakit) of Mathematics Education Program took students to an art museum named ‘Dragon Descendants Museum’, Suphanburi.**

On January 17, 2020, a graduate student (Ms. Nutcharun Yanakit) of Mathematics Education Program took students to an art museum named ‘Dragon Descendants Museum’, Suphanburi. She has practiced teaching in Mahaprutaram Girls’ School under the Royal Patronage of her Majesty the Queen since the first semester, academic year 2019. This field trip allowed students to recall details about the painting and develop critical thinking skills through each painting by discussing on it and with museum learning facilitator explaining more information and details students requested. This is the educational value of field trip as one of extra activities to promote desired characteristics acquired in curriculum.
